MBAH'S ADVENT, AN AGGREGATION OF TALL WORK TO FREEDOM

**HIS EXCELLENCY
BRR. PETER NDUBUISI MBAH
THE EXECUTIVE GOVERNOR OF ENUGU STATE**

"tomorrow is here"

PREAMBLE

MBAH'S ADVENT, AN AGGREGATION OF TALL WALK TO FREEDOM

In the last one score, and six years, Enugu State has had a succession of leaders that have attempted to provide succors through a problem solving schemes, in the light of so many challenges besieging the state in many fronts, especially, as it touches on social, economic and politics.

Accordingly, many have indeed proffered solutions each according to his own perspective, and understanding of such existing theory before his emergence or advent.

In the face of all these lingering myriad of socio-political and economic traits, the people of state kept yearning for a transparent, accountable, and transformational leadership that would offer governance that touches all parts, all sectors, and all divide in the state, devoid of sentiments.

Clearly, before the advent of His Excellency, Dr. Peter Ndubuisi Mbah, the state (Enugu), was in dear need of a competent leader who could bring about transformation in all ramifications, and as well, take the state to the same level with other developed countries of the world. Having been in power for just 2 years and some months now, HE. Dr. Peter Ndubuisi Mbah has left no one in doubt that he is capable, and has the median touch in bringing transformational leadership in a pragmatic manner, as evidences before us proudly speaks. Following the above, the state has witnessed unprecedented achievements with far reaching positive impacts on her citizens, in terms of economic growth, social integration, and political stability.

In spite of all these tall works of his, with insightful thoughts for the good people of Ndi Enugu anyi in returning the state to its old glory, some critics still do not seem to be satisfied, some say, he is been used by an unforeseen hands owing to his background (private sector), no doubt this administration led by HE, Dr. Mbah is the most celebrated nationally, and diasporally, while mostly criticized state wise.

However, none of these have negative influence on him or to put the record straight, have deterred him over his focus in getting Enugu State to her new status, in spite of many years that the state has lost on the rough, and solid road to development, as Enugu people expectedly desire an economic revolution and a technological breakthrough, in which all graciously wished that the state can take in form of disruptive innovation in becoming an economic icon, and a technologically advanced state, in line with his political mantra "tomorrow is here".

It is therefore not surprising that, some developmental analysts, media commentators, and few unscrupulous individuals cannot be and are not impressed by the usually slow, long winding, and incremental steps towards the desired goal that constitutes development. Little wonder then that despite the general appreciation of HE. Dr. Mbah, as a good leader with good intentions, who means well for Ndi Enugu, they still believe that his speed of developmental strides are yet to match with a state that is in a hurry to develop, haven faced so much neglect since her creation by the military, in line with his submission, that he will grow the state economy from "4 billion dollars to 30 billion dollars".

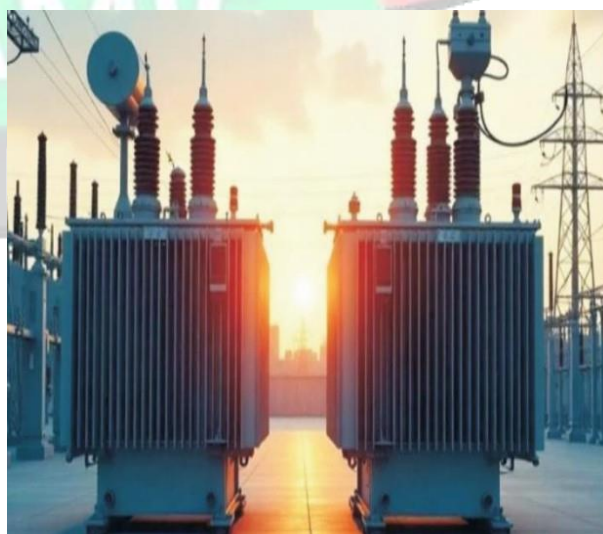

In view of the forgoing, development, not minding how fast or speedy her

citizens cleave for it, we should not forget, is a long winding, intricate, and time demanding process, it is not a push button affair. It is a process that has a gestation period, which implies that, it has an unavoidable working period to achieve desired developmental goals agenda.

Again, long gestation, and period of state development, advocates for genuine, and sustainable development that would see the sense in the systematic approach of HE. Dr. Peter Ndubuisi Mbah to governance ,and his drive towards making Enugu State one of the most top 5 states at the national, sub continental, as well, in international arenas, and as a state with sound economical hub in Nigeria.

In his short stay, at the helms of State's affair, he has taken several strategic decisions, and result oriented actions that have positive implications for the state's long term economic benefits with strong environmental , social, and economic sustainable ideas, including political stability, an initiatives that are too apt, with an overall progression steps, as embedded in his disruptive innovational manifesto, presented to Ndi Enugu prior to gubernatorial election that saw him today as the governor of Ndi Enugu state, despite, his acknowledgeable gradualist pace in bridging the divide that exists between the haves, and have not.

In this regard, Dr. Mbah has made speedy and steady progress in his quest to transforming Enugu State in taking its place among the big players at national, sub continental, and at the international stage.

POWER INFRASTRUCTURE

The state government, under the leadership of HE. Governor Mbah just recently announced, the taking over of power project management, in the same vein, registered and in cooperated Enugu Independent Power Authority, which wasn't a feat too little to come by, as a result, the state today enjoys uninterrupted power supply 24/7, but most importantly is the drop in the billing system from the initial handlers (EEDC) of power distribution in the state, following this, the administration equally saw the need for the repositioning of the State Rural Electrification Management Agency as a novel task, aimed at supporting the rural dwellers in the state.

Aside from steady funding and implementing of the state integrated power projects (SIPPs), as well as, facilitating the achievement of state independent power supply, he equally reinitiated the revamping of the state rural electrification agency as a service provider to the people at grass root level, owing to the power challenges in the state prior to his coming, this idea is to save the state from the constant nightmare been faced earlier from its former handlers, and its incessant power epileptic been previously experienced by the good people of the state in all circle, with its attendant high cost of billing.

This envisioned scheme meant to guarantee stable power supply to Ndi Enugu and its adjoining states, is clearly seen as a search for alternative and renewable source of energy for the state, which serves as a prelude, to the administration's aggressive engagement in looking forward to equally invest in solar power, geothermal, and in wind in the nearest future, in a bid to making Power epilepticness in the state a thing of the past, for us, and for generations yet unborn.

In the same vein, the long abandoned Enugu Coal fields have been revamped to its full operational capacities around the State, the coming back to life of these energy mining fields, are targeted in generating sufficient energy to power its newly, and ongoing industrialization process towards becoming one of the biggest player in both local, and international economy, which forms part of the cardinal vision of this administration, as embedded in 'tomorrow is here'.

To guarantee efficient, reliable, and stable power environment for investors. The government is partnering with so many groups in both private, and public sectors to build skills, and core competence, as a way of luring much needed investors into the power sector of the state's economic activities.

Aside of the reduction in tariff achievements so far recorded, this administration is at verge of accomplishing a greater task in power sector in the country by being the first to make power a stable commodity, and low cost, a thing of the past, which is not inclusive of her position in making sure that she bridges the existing divide in view of public utilities, amongst the have, and have not in the society.

The government has also used the state Bureau for Public Enterprises (SBPE) to reposition the generations, and distributions of power in the state. This move is not in addition to other incentives, and enablers designed to make Enugu Power Sector (EPS) very attractive to investors, considering the billions of dollars needed in transforming the power sector, and its current stiff competition for invest -table funds. All these titanic efforts as been made by this administration to attract investors to the state's owned power sector, cannot be over emphasized.

Human rights, due process, and rule of law have never fared better in the **ENHANCING BETTER DEMOCRATIC ENVIRONMENT.**

state, than under the gentle and even level headed Peter Ndubuisi Mbah. Never shy to correct mistakes nor wary to reverse wrong decisions, he readily allows public opinion to moderate e his actions, and policy directions. Dr. Mbah has proven to be a natural leader, and true democrat, not a ruler, a tendency that has made harks who believe in more autocratic dispositions to see him as too soft for a State of all the Igbos. He allows freedom of expression to flourish, which leads to the tranquility the state enjoys today.

He promotes multiparty solutions to political issues, including the review of the electoral act. A sincere practitioner of participatory governance and people driven development, Peter, actually encourages dialogue, discourage deviant acts, and supports debate of policy opinion across party boundaries, and beyond ethnic divides.

As a non-prejudice leader, he believes in the cannon of separation of powers, he scrupulously respects the in dependence of judiciary, and would not interfere in the activities of the legislature. In the same way, as an advocate of true federalism, he respects autonomous of institutions in the state, including the Local Government Areas.

MULTI NATIONAL TRANSPOTATION SYSTEM.

Beyond the visible impact in the State's Power Sector. This administration has committed a lot of resources to improving, and up scaling of transportation infrastructures in the state.

In pursuance of its integrated Multi model Transportation System (MTS), the regime has invested massively on road redesigning, expansions, rehabilitations, and outright constructions, and upgrading of all road networks, followed by procurement of new brand CNG Buses, with its attendants ultra-modern terminals bestrewn in all major Enugu metropolitan cities, and even beyond the city gates, in addition to aviation sector that sees to the huge investment in Air Buses, (Enugu Air), which equally received a boost that led to attraction of major players in the field (industry), hurrying down to the airport as a save destination for all air operators within the southeast airspace corridor in Nigeria.

Mbah administration engaged in a cost but intensive indispensable project, in other to give Akanu Ibiam International Airport Enugu the state of art upgrading it deserves. It's on record that his administration has achieved a total sum some of new AIR BUSES, equipped with the best of arts in Nigerians air spaces, while not falling shortsightedness on the importance of a state Cargo Air, NDI Enugu is not in doubt will soon come on board.

DIVERSIFICATION OF AGRICULTURAL PRODUCTIVITY

In the same vein, this administration has been promoting agricultural developments, so that, it can be a viable sector employing our youths in their numbers year in, year out, ready source of raw materials for agro-allied firms, and other industries, as well as, a major revenue provider for the state. To achieve this, mass arable lands have been carved out in every ward by the state, for seasonal and non-seasonal farming to boost food production that will guarantee food sufficiency and security for her, including all of her adjoining states, and the nation at large. In the light of the above, huge investment have been made in securing over 1000 NEW BRAND TRACTORS for the farmers in the state, in addition to so many farm implements, and seedlings to go with, at no cost to the farmers.

This paradigm shift from merely providing subsidies and inputs to farmers is to actually address many pressure points, and technical constraints along commodity value chains, in order to remove all factors militating against farm increased productivity. Farmers through their cooperatives, unions, and associations, are being assisted with newly improved seedlings, technical support in both agric, and environmental fields, in addition to improved processing techniques for modern storage facilities, more efficient distribution channels, as well as, better packaging methods to add to their agricultural goods before taking them to market.

To ensure stability, regularity and quality regulatory processing for human consumption. The government has equally flooded the agricultural sector with agric personnel to monitor products, and packaging methods, in other to assist farmers in the state in getting real values for their money.

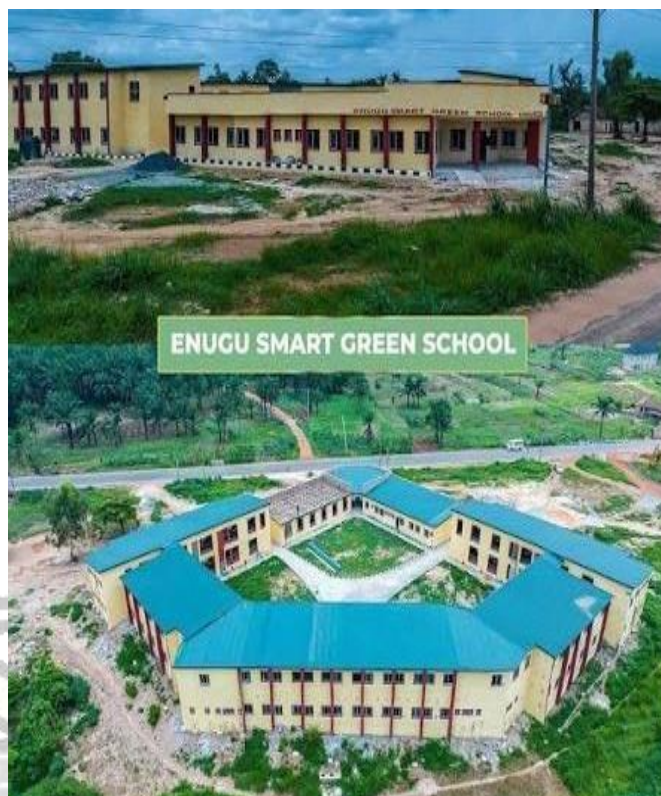

The act of committing himself to provision of sound, efficient, and affordable health to both residents, and non-residents in the state is highly prioritized by this administration. Which implies that the

health sector has not been left-out from the scheme of things in line with Dr. Peter Mbah's health initiative. In matching words with action, the health sector has been constantly favored with proper funding, to justify this, the primary healthcare system in the state has been totally transformed through massive investments by this administration, while ensuring that all existing, and ongoing primary healthcare in the state before his advent are not in lack of adequate medicines, and manpower supplies, in addition to the newly awarded once. The administration equally gave a nod to the full commencement of upgrading of her state's University Teaching Hospital in an unprecedented manner, in addition to the newly inspiring 300 bedded hospital located right here in the heart of state, while not neglecting the completion of the trauma specialist center, which as at today enjoying government patronage, in terms of completion.

To ensure of adequate manpower to man all these exceptional projects when completed, the current administration has embarked on massive training, and retraining of medical, and paramedical personnel to provide requisite manpower for all categories of health challenges going forward. Accordingly, it's necessary to have core center for medical excellence in the state to specialized in major areas of clinical science, with a spread potentials that will handle serious human health needs for the purpose of longevity, and human existence, without the usual slogan of erring. While it is true that, this administration is not just gradually transforming our hope for longevity, he is at the same time giving open hope of equal opportunity to all mankind, that government works, with the likes of HE, Dr. Peter Ndubuisi Mbah, at the helms of affairs, hence the vision must continue, I maintained.

**THE NEW PHASE OF TECHNICAL COLLEGE/ PROTOTYPE
OF 260 SMART SCHOOLS IN ALL WARDS OF STATE
*DRIVE FOR QUALITATIVE EDUCATION***

Expectedly, Dr. Mbah has made an indelible mark in the education sector under 2 years plus of being the governor of the state. His pragmatic approach, and constructive engagement with stakeholders in the education sector has brought an end to primal strikes among lecturers, and students unrests in the state tertiary educational institutions. Apart from his pet project initiative, the "SMART SCHOOL" been commissioned across all the 260 wards that made up the state remains a feat too imaginable to believed, not to talk of been achieved in such a little time. While it is aimed to stimulate education to its apex or pivotal order, it's equally to promote theoretical, and applied learning in its advanced form, through the simple idea of Catching Them Young (CTY), as it applies in other developed countries of the world.

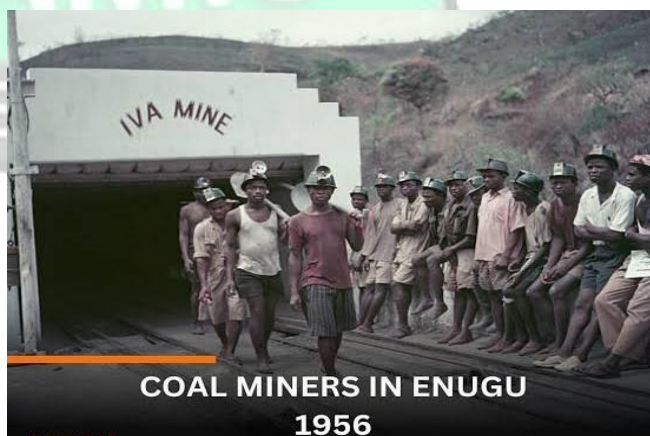

Indeed, the administration have repeatedly made intentional massive investments into the educational sector with an allocation of over 33% of the state GDP, which is more above the UN bench mark on education for developing nations. I make boost to opined that, Enugu is the only state in

Nigeria, that has maintain his position towards education by consecutively, and consistently placing education at its heart through her annual budgetary allocations, which to Ndi Enugu is a deep expression of our believe that HE, is channeling the future of the state into a concrete substance that will lead to a greater future for all, and generation yet unborn.

Realizing the influence of tertiary education for a developing state vis-a-vis the severely limited access to university education by intellectually active, and dissevering Ndi Enugu, and inclusive of all other Nigerians, Mr. Governor has approved the expansion of all tertiary institutions of learning in the state, starting with Enugu State Teaching Hospital, (Park lane), Institute of Management and Technology (IMT), just to mention but few. In the same vein, our colleges of education, vocational schools are not left out, including primary, and post primary schools.

To ensure functionality, and qualitative education, he has directed the supplies of science and technical equipment for all existing institutions of learning in the state, including secondary, and primary schools across board. In addition to making sure that our graduates are computer savvy.

Furthermore, this administration has setup ICT centers in all the seventeen local government areas in the state, including mini or semi urban areas to enhance accessibility by all and sundry. Artisans, and indigents were not left out in his educational scheme, which implies practically prioritizing education in the state.

LOCAL VALUE ADDITION

To promote increased community participation and ownership of our mineral sector by Ndi Enugu. Dr. Peter Mabh's administration stood firm to ensure passage of Enugu state mining bill, as well as, support the enactment of local content art, that is meant not only to create, and promote jobs for the state artisans, technicians, technologists, and engineers, as well as, other professional in the Coal City, and all other in excavating sectors of the economy. But as well, dig deep into other green economies of the state, such as, low gas emission economic activities, as well as, protection, and conservation of our environment for our immediate consumption, and future use by generations yet unborn, as encapsulated in UN 17 goals and 146target on sustainable developments agenda.

This local content regime will lead to mushroom of small scale firms that can supply input and raw materials for major excavating and marketing companies. It will as well, stimulate the growth of small and medium enterprise in other to utilize some of the end and byproducts from the big co-operations, multi nationals groups, and other organizations. The local content act will definitely domiciled the production and utilization of big proportions, and derivatives from the coal sector in the state, thus ensuring that the larger percentage of the coal reserves are retained in Enugu to drive the newly and upcoming scheme for industrialization of the state by this administration, led by HE. Dr. Peter Ndubuisi Mbah, to a fruitful end and to breathe life into the real production sector of the economy, the government in their wisdom has created enabling environment by ensuring the old ways and manners government do business are made easier, as well, transformed, in addition to full utilization SME's, and other states credit institutions for all-inclusiveness of her populaces.

MAINSTREAMING ENUGU ON NATIONAL, AND AT GLOBAL STAGE.

Asides of all these numerous others, at the national stage, the retaining of our two sons at the national level remains most relevance in integrating our state into national development. On the other hand, a pride the state holds at the national level, as well depicts a quality dialogue over our governor's constructive engagement with the league of developing technocrats at the national scene, for example, the retirement of immediate past chief of Naval of Staff, and the reappointment of Chief of Air Staff from the state into our nation's main security architecture serves as sound vision of purpose, and its subsequent engagements by the President, and Commander in Chief, of Federal Republic of Nigeria, is another attestation, as well, points to what the state stands to derive at the centre, as she continues her involvement with the central administration in Nigeria.

Furthermore, the administration's sustainable development diplomacy has translated to major investment in power sector, coal, tourism, solid minerals, telecommunications, and quality incentives from the center, as well as, promotion of GREEN JOBS in the state. Under his watch, Enugu state will continue to witness classical and sub-regional leadership role in promoting peace keeping, economic cooperation and regional integration, as well, maintained her lead of being in forefront of pro-democracy activities in the country, since the amalgamation of the southern and northern protectorate in 1914.

Looking beyond 2027, it is obvious that Dr. Mbah will do more in the light of democracy dividends, as the med year of his first tenor has already set the tune for greater agenda against 2027, in view of the humane face that his integrity, pedigree, aura as a person is commanding at the global stage, not talk of our nation Nigeria.

GOING GREEN

The UN sustainable development Goals which Nigeria is a major player in promoting it's objectives within the continent, has Enugu State as the only state in Nigeria today, that has effectively introduced some specific areas in line with her 17 Goals, and 146 Targets, through humane policies, and directives that it's impact fullness is green, and sustainable in nature.

With the coming on board of over 2000 CNG BUSES, SOLAR POWERED STREET, and TRAFFIC LIGHTINGS, and all other enablers, the administration has engaged in training, and retraining of her youths in GRREN JOBS areas, which have indeed created huge economical values for all classes of workers in the state, therefore making the state a pathfinder

for solution that the world is desiring in terms of GREEN JOB in Africa, Nigeria, especially in the Southeastern part of the country.

Sordid to cite here that, the administration stands tall, in her novel drive on green economy that it value chain will strengthen the immediate achievements, more especially, in the areas of climate change, as well as, creation of green jobs with the aim to properly address the root causes of poverty, and bring us together in achieving landmark change for the people, while making the Enugu State an ecofriendly environment. Little wonder, the UN is taking all steps necessary in making sure that the state continues to play her major role in this regard, by supporting in all fronts, steps taken in terms of policy management, and take off initiatives, through his humane inspiring approaches.

SECURITY

Governor Mbah in all sincerity of purpose, has donated more security apparatus to the Nigerian police, military, and all other paramilitaries in the state in a bid to save guiding the state since his advent, ranging from Distance Response Squared (DRS), motors, and camera surveillance, in addition to trained personnel to man all forests reserves in the state. All these are aimed to enhance and give better security to our environment, resources, , as well as humans.

Going forward, his administration has procured more than 100 unites of DRS, equipped with the best of state of art security gadgets to fast track crimes, and any other unforeseen eventuality in all parts of the state, with a sophisticated, and highly coordinated control, and observational room, making the state to become unbearable to deviance of all sorts, as the government has enacted laws that has caused crimes committers to abandon the state, war against Ndi dibia, and the Ndi Ezenwayi, whom now find it too hot to survive in all parts of the state, as well, shown the way out, once it's established that any of their activities are found to be suspicious, and goes contrary to the method of principles of sound traditional healings.

All these amounts to keeping the state secured from all forms of law breaking agents, who hide under the porous-ness of our nation's security, and leniency of government to commit, and abet crimes in the society.

On the other hand, our forests had never fared better than now, ever since he took office, as the Executive Governor of the state. Is on record that, some of his counterparts in other states are running to him for idea sharing, in a bid to enhance their own state administrative prowess, more especially, in the areas of securing lives, and properties, which our constitution observed as the main statutory obligation of every state government in her domain.

Today's Enugu State is one of the most peaceful, tranquilizing, and enjoyable state in Nigeria, and as a result of that, the state has hosted so many events be it concerts, programs of interest, conferences, and workshops of commanding influence in world, including MBA 2025, as

such, looking forward to hosting NAFEST too, in this same physical calendar year. Hence, the accrued benefit to the state are too numerous to quantify.

ROAD INFRASTRUCTURE

On the assumption of office as the governor of the State, Governor Peter Ndubuisi Mbah calmly took a census all road networks in the state through the commission that is saddled with responsibility of road infrastructure, the outcome of this findings led to his declaration of war on road infrastructures in the state, ranging from, rehabilitation, expansion, and construction of new ones, with outright urban facelift. This singular action of his equally led to overwhelming reaction from the entire citizens, and all adjoining states in the Southeastern part of the country. Remarkably, is his administration's award of 20 kilometer road per ward throughout the state, Little wonder why all the rural dwellers in the state are found to be deeply enamored with him as their leader, and governor.

Worthy to mention here equally, is on how overwhelmingly our President, Asiwaju Ahmed Tinubu was during his state visit, and project commissioning. Through his physical expression, it was clear that, Mr.

President was lacking on words, on how best to express his appreciation over Dr. Mbah's performance (s), but one thing stands clear, that his visit indeed ramped up his direct appeal to have Dr. Mbah as his developing partner at the national level, for effective management of the nation, as evidence before us have clearly demonstrated at both in the state, and at the national level, where HE, Dr. Peter Ndubuisi Mbah in less than few days he linked up the state to what I termed national grid, was assigned to lead other of his counterparts in reforming the Nigerian Police, been one of the most oldest, and prestigious institution in Nigeria.

In addition to all these, are the NBA's conference, and so many other conferences that took place at the state ICC. As we speak, NAFEST is on the way, and in one sentence, Chimamanda (the most wildly celebrated author of our time), described today's Enugu State, as "a home coming place", during one of her visit, owing to her empirical experiences or sport assessment of the new Enugu, however, she is not alone in her exaltations over Mbah's dividends of democracy results, as many other prominent Nigerians from all walks of lives like Pit Edoche, Emeka Anyaoku, in his annual memorial lecture opined too, while too many others numerous to mention here till this day, have continued to express their joy over the median hands of his administrative prowess in touching the lives of all residents, and non-residents in the state, in regard to their quantum of experiences during their visits to Enugu, pointing directly to the quality of good works, and road infrastructure in the state, etc.

These actions of his are prone value chains in many fronts. In the same way, made special caveat for the rural areas too in terms of dividends of democracy, in order to make sure that rural dwellers are equally, and comprehensively carried along in all state affairs.

All these are targeted to enhancing the living standards, and social welfare of rural dwellers, as well, creating a balanced social relationship through ashtray road networks among the populace in the rural areas of the state.

Opening up access roads to agric exportation to the cities centers, while farmers smile home with more money in their pockets, hence, increasing productivity in all fronts.

WATER FOR ALL

In line with universal axiom, which upholds that, "water is life" stands firm, and tall in the state, till this moment. Ndi Enugu ever since his emergence have been embracing new experiences in terms of leadership style in addressing societal needs, more importantly as it touches the issue of pipe borne water in the metropolitan, and all adjoining communities, and with its ongoing expansion water projects in the metropolis, and to all other areas of importance, the past challenges been faced over this will soon be a complete history.

To ensure a continued ongoing access to pipes borne water in the state, the administration has engaged in an ongoing expansion of voluminous water capacity reservoir for the state, to the tune of 120 million capacity liters per a day, domiciled at Ajali water treatment plant. In the interim, she equally carried an overall turn around maintenance, at the previous reservoirs, with high capacity pumping support systems, in other to cushions the effects of water scarcity in the state, at the dawn of ongoing expansion works on water facilities in the state, water issues will become a thing of the past.

The scheme when completed will ensure enhancement to the quality, and provision of good pipe borne water supply in the state, thereby reducing all kinds of water borne diseases in the state to the barest minimum, if not totally eradicated. This is in addition to dry, and raining seasons farming that such scheme is meant to offer all communities around the plant, when it finally comes on board.

WOMEN EMPOWERMENT.

In fairness to all, Peter Mbah's administration, in no doubt has brought into governance more women than any other administration in the state since her creation, in fact the 35 % UN nation reserve for women promise, he clearly observed in line with his manifesto in the buildup campaign for 2023 general election, as well, a reason one can emphatically attest to say here, he made do his promise.

In spite of the above, our amiable first lady Mrs. Chinyere Mbah have continually augured for the need for our women to attain political freedom, first, or be granted financial freedom to enable them partake in the decision making process in the state on regular bases.

Hence, the organized workshops, symposium, conferences and executive training, to mention but few, in other to give the women voice both at local, state, and at national level, (s).

CONCLUSION

As a government, the administration has chosen to continue in their supports for sound initiatives, programs or interventions that will strengthen their collective resolve to end poverty in the state, conserve our Planet Earth, and ensure that peace, prosperity, and above all, tranquility rains supreme in the state going forward, through her humane policies initiatives.

In return, Ndi Enugu are not ungrateful people, and know what it means to cherish and repay good deeds, should we actually wish to continue with the promotion of excellence, and efficiency in governance in the state beyond 2027, as embedded in a true democratic norms, and its attendant dividends of democracy, as in any democratic settings in any part of the world, then, Ndi Enugu should look no further.

Because, from these myriad of achievements of Dr. Peter Ndubuisi Mbah's administration, as highlighted above, we should in unison work towards giving him a CLEAR MAJORITY MANDATE (CMM), his party needs in our state, and at national assembly in order to strengthen his hand to govern with fairness, equality, equity, and justice, for which, he is known for.

It is in the light of all the above, therefore, I wish to state categorically here that, His Excellency. Dr. Peter Ndubuisi Mbah, be rewarded without any encumbrance, with another term of 4 years in office, in order to enable him accomplish the good, and visionary work he has nursed, and nurtured over the years for us Ndi Enugu, di kaa osi metute beanyi, bu mpahara odida anyawu nke Nigeria, tupu owehalu okwa ochichi na Enugu State anyi, na afor 2023.

Ma ka na, mba nile kewkolitala, we si na, etoo dike na nke omelu, omee ozor.

Nkaa gosikwala, na ezi, na ezi, "TOMORROW IS HERE".

JOIN DR. MBAH, IN BUILDING A NEW ENUGU OF OUR DREAM

of
HIS EXCELLENCY
BRR. PETER NDUBUISI MBAH
THE EXECUTIVE GOVERNOR OF ENUGU STATE

WHERE WISDOM RAINS, RESULT IS INEVITABLE

Prince (Dr.) Nnah Marcel
